Executive Summary

This report presents the findings of the independent audit of the Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) program. The hatchery is located on the Deschutes River about 9 miles from Maupin, Oregon. The hatchery is used for incubation and rearing of summer steelhead, rearing of winter steelhead, and maintenance of two resident rainbow trout broodstock.

The audit was conducted in 1996-1997 as part of a 2-year effort that will include 67 hatcheries and satellite facilities located on the Columbia and Snake River system in Idaho, Oregon, and Washington. The hatchery operating agencies include the U.S Fish and Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife.

Background

The audit is being conducted as a requirement of the Northwest Power Planning Council (NPPC) Strategy for Salmon and the Columbia River Basin Fish and Wildlife Program. Under the audit, the hatcheries are evaluated against policies and related performance measures developed by the Integrated Hatchery Operations Team (IHOT). IHOT is a multi-agency group established by the NPPC to direct the development of new basinwide standards for managing and operating fish hatcheries. The Bonneville Power Administration (BPA) contracted with Montgomery Watson to act as an independent contractor for the audit.

IHOT has established five basic policies that cover: (1) hatchery coordination, (2) hatchery performance standards, (3) fish health, (4) ecological interaction, and (5) genetics. The audit focuses on all these policies, with the exception of hatchery coordination. These policies are set forth in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries (IHOT 1995)*. That document is the source for the performance measures that are the basis of this audit.

The Audit Process

The audit was based on the facility management's response to a 109-page questionnaire. This audit form was completed through a five-step process in which:

- Information was obtained from headquarters.
- The hatchery manager was asked to fill out and return the audit form.
- A 1-2 day site audit visit was conducted to inspect facilities, review hatchery records, discuss audit form responses, and develop remedial action plans.
- A compliance report was developed to document the compliance status of each performance measure. This report was then shared with the hatchery manager and IHOT representative.
- This hatchery evaluation report was written to document compliance with IHOT performance measures and develop cost estimates for remedial actions when needed.

Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Results

The Oak Springs facility includes 4 ponds for rainbow trout broodstock holding, 8 concrete raceways, 2 Burrow's ponds, 5 circular ponds 14 rearing ponds, and incubation facilities. The facility, which is operated with state funds, produces steelhead and resident trout.

The Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) program was in general compliance with most of the performance measures. The audit found that the hatchery was not in compliance with water quality monitoring requirements, alarm requirements, double screening of rearing units, predation control requirements, and in-basin acclimation or rearing, which are all facilities requirements. The hatchery needed to develop specific rearing standards for the IHOT Operations Plan, and develop a smoltification goal and monitoring plan. The hatchery needed to verify compliance with rearing standards. The hatchery was also not in compliance with all the feed storage, transportation, and hatchery sanitation procedures.

The specific areas in which the Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) program requires remedial actions based on the IHOT performance measures are listed below. These remedial actions are listed in alphabetical order without intent of ranking or otherwise assigning priority:

- Check flow alarm daily and other alarms weekly
- Check temperature of moist pellets at delivery
- Conduct IHOT QA/QC tests for feed preparation
- Develop alarm logs
- Develop smoltification goal and monitor
- Develop specific rearing standards for IHOT Operations Plan
- Follow IHOT protocols for disinfection of vehicle interiors and exteriors
- Follow IHOT temperature criteria for transport
- Install security alarms
- Install alarms on intake, large rearing ponds, raceway headboxes and rearing ponds
- Install outside system and buzzer
- Install telephone pages

- Insulate feed hoppers and bulk storage facilities
- Monitor and record DO and TGP and record
- Provide double screens on raceways and ponds
- Provide effective predation control
- Provide rearing or acclimation in the subbasins
- Review production goal or size goal to meet size goal
- Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, nitrite, and contaminants
- Verify compliance with rearing standards
- Wear protective garments when handling fish eggs or cultural water

Non-compliance issues resulting from items beyond human control or Performance Measures not relevant to this hatchery (Type 1 in Table 3, Section 4 of this report) were not listed above.

Facility Description

Name: Oak Springs Hatchery

Stock/Species: Summer Steelhead

Winter Steelhead (Clackamas River Stock)

Winter Steelhead (Hood River Stock)

Rainbow Trout

Operating Agency: Oregon Department of Fish and Wildlife

Funding Agency: ODFW

Location: The hatchery is located on the Deschutes River about 9 miles from

Maupin, Oregon

Address: 85001 Oak Springs Road

Maupin, OR 97037

Hatchery Manager: Mr. Randy Robart

Phone: (541) 395-2546

Fax: (541) 395-2595

Purpose: The facility, which is operated with state funds, produces steelhead and resident trout.

Production Goal: **Summer Steelhead**

Produce 225,000 fingerlings (2,350 lb) for transfer to South Santiam Hatchery

Produce 170,000 fingerlings (1,250 lb) for transfer to Gnat Creek

Hatchery

Produce 270,000 fingerlings (1,000 lb) for transfer to South Santiam

Hatchery

Produce 75,000 smolts (15,000 lb) for release into the Salmon/Zigzag

River System

Produce 60,460 smolts (12,000 lb) for release into the Hood River

Winter Steelhead (Clackamas River Stock)

Produce 40,000 smolts (8,000 lb) for release to Clackamas River

Winter Steelhead (Hood River Stock)

Produce 50,000 smolts (10,000 lb) for transfer to Hood River

Rainbow Trout

Produce 3,820,000 eggs and 131,134 lb of fish for various ODFW programs

Water Supply:

The present water delivery system can deliver approximately 11,670 gpm to the hatchery. Some mixing with re-use water occurs from one pond series to another.

Facilities:

Adult Holding:	2 brood ponds for rainbow trout broodstock - 10,818 cf each
	2 lower ponds for rainbow trout broodstock - 7,207 cf each
Incubation:	12 16-tray vertical stack incubators - 192 trays
Early Rearing:	4 - 19 foot Canadian troughs
Raceways:	2 Burrow ponds - 2680 cf each
	8 raceways - 3,481 cf each
Rearing Ponds:	5 circular ponds - 2,120 cf each
	9 north ponds - 9,433 cf each
	5 lower ponds for rainbow trout - 7,207 cf each
Satellite Facilities:	None

Compliance Status

The hatchery audits are based on compliance with written IHOT performance measures. These performance measures are documented in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries* (referred to as *IHOT 1995* in this report).

The purpose of the performance measures is to implement new basinwide policies that provide regional guidelines for operating anadromous hatcheries in the Columbia Basin.

The audit focuses on performance measures for IHOT policies that cover (1) hatchery performance standards, (2) fish health, (3) ecological interaction, and (4) genetics. These performance measures are intended to guide hatchery operations once production is established. For that reason, the hatchery operations audit included broodstock collection, spawning, incubation of eggs, fish rearing and feeding, fish release, equipment maintenance and operations, and personnel training. Production priorities are beyond the scope of this audit.

Based on *IHOT 1995*, a detailed 109-page audit form was developed. The audit form divided the performance measures into six major sections along major program and technical criteria areas. Two additional sections (sections 1 and 8) include general information and expenditure information needed for this Hatchery Evaluation Report and blank forms for additional comments. The following is the basic structure of the IHOT audit form:

Section 1 Performance Measures for General Information and Expenditure
Information (PMs General 1-2)

Integrated Hatchery Operations Team (IHOT) 1995. *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries*, Bonneville Power Administration, Portland, Oregon.

Section 2	Performance Measures for Program Objectives (PMs 1-4)
Section 3	Performance Measures for Facility Requirements (PMs 5-15)
Section 4	Performance Measures for Hatchery Practices (PMs 16-25)
Section 5	Performance Measures for Fish Health Policy (PMs 26-34)
Section 6	Performance Measures for Ecological Interactions (PMs 35-38)
Section 7	Performance Measures for Genetics Policy (PMs 39-43)
Section 8	Blank Forms for Additional Comments.

Several performance measures are repeated in various sections of the audit form. These performance measures overlap in *IHOT 1995* and were retained to allow individuals interested in specific portions of the audit (such as Genetics or Fish Health) to determine the compliance status of all performance measures for a given topic in one location. A repeated performance measure is indicated by shaded text.

The Hatchery Audit Process

The hatchery audit will be conducted over a 2-year period that concludes in 1997. At each hatchery, a five-step process was used to complete the overall hatchery audit.

This process consisted of research and onsite visits. The site visit at the Oak Springs Hatchery was conducted on March 10, 1997.

The following is the five-step audit process:

1. Information was obtained from headquarters.
2. The hatchery manager was asked to fill out and return the **Audit Form**.

3. A 1-2 day site audit visit was conducted at each hatchery. During that visit an audit team inspected facilities, reviewed hatchery records, discussed audit form responses, and developed remedial action plans when appropriate.
4. During the site visit, the compliance status of each performance measure was discussed with the hatchery manager and IHOT representative. A portion of the Hatchery Evaluation Report was sent to the hatchery manager following the audit visit as a **Compliance Report**. That Compliance Report is Table 2 of this report.
5. Information from steps 1-4 was used to prepare a draft **Hatchery Evaluation Report**. This draft report was submitted to the operating agencies for review of the information used to determine compliance. Based on review and comments, a final Hatchery Evaluation Report was developed. The final report documents the compliance of a particular hatchery with the IHOT performance measures and presents cost estimates to correct any deficiencies.

Compliance Status of Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock)

The following table includes information on life-stages that are held on this facility for some portion of their rearing cycle (Table 1). For multi-facility programs, summary cost and contribution data is presented at the facility where rearing occurs. For the compliance status relating to performance measures that do not occur at this hatchery, please refer to the Hatchery Evaluation Reports for the hatcheries and stocks listed in Table 1. A check mark (✓) indicates that the specific life-stage is held at this facility.

This section documents the compliance status of the Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) program. Each performance measure is presented in a table taken from the audit form (Table 2). The compliance status is identified by the following categories:

- **N/A** (not applicable)
- **Yes** (in compliance)
- **?** (unknown; generally due to unavailability of information to determine compliance)
- **No** (not in compliance).

Remedial actions are suggested for performance measures not in compliance. These remedial actions are grouped into categories and listed in Section 4 of this report, where the cost of the required remedial actions is also presented.

Table 1 Summary Program Information for Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock)

Component	Location of Adult Holding, Spawning, Incubation, and Rearing					
	Clackamas Hatchery	Oak Springs Hatchery				
Adult Collection	4					
Adult Holding	4					
Spawning	4					
Fertilization	4					
Incubation						
green-to-eyed	4					
eyed-to-hatch	4					
Rearing

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

		N/A	Yes	?	No		
	Type 4: <u>Michigan raceways</u> Do you have an adequate number of units for the overall program?		4			Inspection of facilities/Discussion	
	Type 5: <u>L series</u> Do you have an adequate number of units for the overall program?		4			Inspection of facilities/Discussion	

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#10	Screening facilities						
	Do you meet the approach velocity criteria?	4				No wild fish in water supply	
	Are the fish screens regularly cleaned?		4			Inspection of facilities/Discussion	
	Does the screen mesh meet screen opening criteria?	4				No wild fish in water supply	
	Are rearing containers double screened for fish that should not be released to adjacent water?				4	Inspection of facilities/Discussion	Provide double screens
#11	Predator control facilities						
	Are your predation control facilities effective?				4	Inspection of facilities/Discussion	Provide effective predation control

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#12	Food storage facilities and quality control						
	Does the storage of dry/semi-moist/moist foods (dry<12%; semi-moist 12-20%; moist >20% moisture) follow food manufacturer's recommendations?		4			Inspection of facilities/Discussion	
	Does a regional quality control officer oversee production procedures and monitor:						
	Verification by feed manufacturer that ingredients meet specifications?				4	Discussion	Conduct IHOT QA/QC tests for feed preparation
	Ensure feed does not contain unwanted drugs or other additives?				4	Discussion	See above
	Analyze ingredients contained in the final food product to ensure that feed specifications have been met?				4	Discussion	See above
	Are the foods stored and handled according to the following criteria?						

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

		N/A	Yes	?	No		
	Moist pellets should not exceed 10°F at point of delivery.			4		Not sampled	Check temperature of moist pellets at delivery
	Moist pellets should be removed from freezer just prior to feeding.		4			Discussion	
	Do not leave buckets of feed or feed containers outside exposed to light or heat.		4			Discussion	
	Open bags of feed should be fed within 1 to 2 days except when feeding small groups of fish.		4			Discussion	
	Automatic feeder hoppers and bulk storage facilities should be insulated against excessive temperatures (80°F and above).				4	Discussion	Insulate feed hoppers and bulk storage facilities

#22a	Does hatchery performance meet requirements outlined in the regional hatchery policies and in subbasin and hatchery plans for the following areas?						
#22a1	Percent smoltification Do you measure percent smoltification? Do you have a smoltification goal Did you meet the smoltification criteria?			4	4	Discussion Discussion Discussion	Develop smoltification goal and monitor See above See above
#22a2	Rearing density (prior to release) Did you meet the rearing density criteria just prior to release?			4		No criteria	Develop rearing density criteria
#22a3	Disease condition (at release) Did you meet all disease regulations just prior to release?		4			Review of records/Discussion	
#22a4	Number (at release) Did you meet the release number goal?		4			Review of records/Discussion	
#22a5	Size at release Did you meet the size goal?				4	Did not make size goal in 1996	Review production goal and/or size goal

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

		N/A	Yes	?	No		
#22a6	Dates of release						
	Did you meet the release date goal?		4			Review of records/Discussion	
#22a7	Location of release						
	Did you release the fish at the specified location?		4			Review of records/Discussion	
#22b	Are fish reared in the subbasin or acclimated in the subbasin?						
	Are the fish reared in the subbasin?				4	Discussion	Provide rearing or acclimation in the subbasins
	Are the fish acclimated in the subbasin?				4	Discussion	See above
#22c	Is the release strategy appropriate for the program?		4			Discussion	

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#23	Transportation facilities						
	Do transportation equipment and personnel receive disinfection before and after use?		4			Discussion	
	Is the fish tank interior disinfected using a solution of 200 ppm active chlorine for 30 minutes minimum or formaldehyde gas generation method (relative humidity of 60% for 2 hrs)?		4			Discussion	
	Is the exterior of the fish transport vehicle disinfected using high pressure steam (115-130°C), high temperature acid, or with 200 ppm chlorine for 30 minutes?				4	Discussion	Follow IHOT protocols for disinfection of vehicle interiors and exteriors
	Is the fish transport vehicle (cab) disinfected using 600 ppm quaternary ammonia compounds (1.5 ml of 50% stock solution/liter water)?				4	Discussion	See above
	Is other equipment disinfected including fish pumps, nets, egg sorters, waders, boots, rain gear, hoses and other equipment using one of the following solutions?	4				Discussion	

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

		N/A	Yes	?	No		
	200 ppm chlorine for 30 minutes 600 ppm quaternary ammonia compound for 30 minutes 200 ppm iodophor solution for 10 minutes					Discussion	
	Do personnel wear protective garments when handling fish eggs or cultural water?				4	Discussion	Wear protective garments when handling fish eggs or cultural water
	Do the fish transport truck/chassis and tank/unit receive an inspection and service prior to the release season?		4			Discussion	
	Is a daily service inspection completed before starting up and leaving for the day?		4			Discussion	

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#23 (cont)	Transportation facilities						
	Does the fish transport unit receive an inspection prior to loading?		4			Discussion	
	Does a pre-loading inspection covering tank water level, pumps or aerators, oxygen injection system settings, displacement gauge, and truck loading/hauling density tables checked and reviewed occur prior to loading fish in the transport unit?		4			Discussion	
	Do hauling criteria include checking the fish 45 minutes to 1 hour after loading?		4			Discussion	
	When fish are active and systems are functioning properly, is the oxygen concentration reduced and maintained at approximately 8 ppm?		4			Discussion	
	Is water temperature in the transportation unit maintained within the 42-48 °F range?				4	Discussion	Follow IHOT temperature criteria for transport

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

		N/A	Yes	?	No		
	Do fish releasing procedures include the following criteria?						
	Releasing the fish at the correct release site or into the correct water body.		4			Discussion	
	Tempering or the difference between the liberation tank and the target water body should not exceed 10°F.		4			Discussion	
	The liberation hose should be angled so that fish gently hit the water. Using a tripod is a method of ensuring the hose will stay at the proper angle.		4			Discussion	

Table 2 Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#24	Evaluation practices						
	Has the hatchery conducted fishery contribution studies to:						
	Determine the requirements for evaluating and improving management programs?	4				All fish return to Clackamas River	
	Develop guidelines that define the geographical area and identify component stocks (hatchery and/or wild) that comprise the management unit?	4					
	Develop guidelines that define if the proper stocks of fish are currently being used?	4					
	Determine which management units contribute to a specific fishery and the time periods of those contributions?	4					
	Determine the relative contributions of the various management units to a specific fishery over the different time periods?	4

		N/A	Yes	?	No		
#43	Is there a genetics monitoring and evaluation program in place?						
	Is a genetics monitoring and evaluation program available?	4				Adults return to Clackamas River	
	Does the plan address the following elements listed in IHOT:					See above	
	Does the program have elements needed to meet evaluation goals 1-4?	4				See above	
	Has a qualified geneticist reviewed and endorsed the program (goal 5)?	4				See above	
	Will the program collect the data and maintain the records needed to evaluate compliance on an ongoing basis (goal 5)?	4				See above	
	Is the program understood and followed by staff?	4				See above	

Remedial Actions

Based on the compliance status for each performance measure, remedial actions were developed. The required remedial actions are organized into five categories. The types of categories range across a spectrum from those actions that are beyond human control, to those that require a change in agency policy or procedures, to those that involve a significant capital cost to put in place. The following are the five types of remedial actions identified under phase 1 of the audit:

The Five Types of Remedial Actions

Type	Description
1	Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery
2	Remedial actions requiring changes in agency policies or procedures
3	Remedial actions requiring changes in monitoring coverage or interval
4	Remedial actions requiring significant capital expenditures
5	Remedial actions that may require significant capital expenditures but are not clearly definable at this time

Remedial Actions at Oak Springs Hatchery -

Winter Steelhead (Clackamas River Stock)

This section presents the corrective actions required to bring the Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) program into compliance with IHOT performance measures. The remedial actions suggested here are just that, suggestions developed by the Montgomery Watson Audit Team. For some non-compliance areas, other remedial actions could be proposed. The required remedial actions are cross-referenced to each IHOT performance measure that was not in compliance. Where appropriate, the costs associated with the remedial actions are also presented (Table 3).

The cost estimates presented in this section are based on professional experience from similar projects. In most cases, only a lump-sum figure is presented, and detailed take-off lists have not been prepared. The cost estimates are essentially order of magnitude estimates ($\pm 40\%$).

More importantly, the suggested remedial activities may also present several levels of action. Optional actions have been listed for several problems. These optional actions are desirable for either operational or safety considerations.

**Table 3. Remedial Actions Required at Oak Springs Hatchery - Winter Steelhead
(Clackamas River Stock)**

Remedial Action Required	Cost	PMS ¹
Type 1 - Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery None	----	
Type 2 - Remedial actions requiring changes in agency policies or procedures		
Check flow alarm daily and other alarms weekly	----	6
Develop alarm logs	----	6
Conduct IHOT QA/QC tests for feed preparation	----	12
Check temperature of moist pellets at delivery	----	12
Develop specific rearing standards for IHOT Operations Plan	----	19, 22a2
Verify compliance with rearing standards	----	19
Develop smoltification goal and monitor	----	22a1
Review production goal or size goal to meet size goal	----	22a5
Follow IHOT protocols for disinfection of vehicle interiors and exteriors	----	23
Wear protective garments when handling fish eggs or cultural water	----	23
Follow IHOT temperature criteria for transport	----	23

Remedial Action Required	Cost	PMs ²
Type 3 - Remedial actions requiring changes in monitoring coverage or interval		
Monitor and record DO and TGP	---	5b
Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, nitrite, and contaminants	---	5c-5g
Type 4 - Remedial actions requiring significant capital expenditures		
Install alarms on intake, large rearing ponds, raceway headboxes and rearing ponds	\$60,000	6
Install security alarms	\$20,000	6
Install outside system and buzzer	\$2,000	6
Install telephone pages	\$2,000	6
Provide double screens on raceways and ponds	\$7,000	10
Insulate feed hoppers and bulk storage facilities	\$10,000	12
Provide rearing or acclimation in the subbasins	\$2.0 million	22b
Type 5 - Remedial actions that may require significant capital expenditures but are not clearly definable at this time		
Provide effective predation control	---	11

Hatchery Contribution to Fisheries, Spawning Grounds, and Hatcheries

This section presents the audit findings for the Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) program contribution of adult fish to fisheries, local fisheries, spawning grounds, and hatcheries. Data is reported by broodyear. A broodyear refers to the adult contribution from the eggs produced from a single group of spawning adults. For some species, this may include fish caught as 2-, 3-, 4-, 5-, and 6-year old fish. Because of the return distribution and data processing delays, the complete adult contribution for a given broodyear may not be available until 4 to 5 years after the fish have been released from the hatchery.

Table 4. Adult Contribution to Fisheries, Spawning Grounds, and Hatcheries: Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock)

Year	Fisheries (Broodyear)	Spawning Grounds¹ (Broodyear)	Hatchery¹ (Broodyear)	Total Combined Contribution (Broodyear)	Smolt to Adult Survival (percent)

Annual Operating Expenditures

The level and detail of annual operating expenditures varies widely depending on hatchery, operating agency, and funding source. When provided, expenditures were presented in terms of personnel costs, operating costs (power, feed, supplies), capital costs, indirect costs charged to the federal government, third-party costs, and other costs. These cost components were summed to determine a total hatchery annual cost. Based on discussion with the hatchery manager, the percent of total hatchery costs allocated to a given program was estimated. The total hatchery costs and the percent of hatchery costs allocated to a given program were used to compute the cost of a given program. Table 5 shows the annual operating expenses for the Oak Springs Hatchery - Winter Steelhead (Clackamas River Stock) program. For programs that occur at more than one facility (as shown on Table 1 in Section 3 of this report), the cost breakdown for the component(s) at each facility is presented in separate tables (Table 5a).
